CHURCH NOTICES AND ACTIVITIES

NEWS ITEMS FROM KINSELLA

Sunday, April 29th
Irma Sunday School 11 A.M.; Services for the Oddfellow's. Everybody welcome, at 8 P.M.

Res. — 11 A.M.

Alma Mater — 2 P.M.

The Irma choir will repeat their Easter music at the afternoon services.

Roseberry — 3:30 P.M.

The Trustee Board have purchased twenty-five additional chairs so we shall not have a repetition of last Sunday night of more people than seating capacity.

2 SYNDICATES PLANNING TEST AT WAINWRIGHT

F. H. Hutton, Geologist, Filed on Big Birch Lake Acreage

Deep tests will be made of the Wainwright oil field by a least two syndicates with whom he is connected, stated Fred H. Hutton, geologist, before leaving for Calgary on Monday evening. While not disclosing the names of his principals, Mr. Hutton said that they intend to do a lot of development work.

On Monday, Mr. Hutton filed upon 16,000 acres in the vicinity of the Birch Lake field. With this additional acreage, wealthy Duluth interests now have some 35,000 acres of leased oil lands in that district.

Drilling will start about June 1st,

said Mr. Hutton, and the whole structure will be thoroughly tested with deep wells. The program calls for possibly three of these wells this year, locations of which will be selected shortly.

After looking over the Turner Valley field, Mr. Hutton will go on to Denver where he will consult his principals with regard to the season's operations.

**MUNICIPAL DISTRICT OF
BUFFALO COULEE No. 433**

Notice is hereby given that, under the provisions of the Tax Recovery Act, 1922, and amendments thereto, the Municipal District of Buffalo Coulee No. 433 will offer for sale, by public auction, at Saltaux School House located on the S. W. 1/4 48-8-8, on Saturday, the 12th day of May, 1928, at 1 p.m., the following lands (unless previously redeemed), subject to a reserve bid and terms to be announced at the sale, also to any endorsements on the certificates of title:

Per Sec. Sec. Twp. Rec. M.

Education and Religion

There is no subject in which the people of Western Canada take a deeper or more continuing interest than the subject of education. They demand the best for their children, and that they are prepared to pay for it is manifested by the splendid school buildings which are an outstanding feature in every Western town and village and in the steadily improving character of rural school houses, coupled with the generous financial provision made for the upkeep of the schools. Whatever complaint there may be in regard to the size of tax bills, the majority view is that, where prudence of expenditure is necessary, it must not be done at the expense of efficiency in education.

Demanding the best in education, there is much difference of opinion as to what constitutes the "best" and how it is to be attained. It is generally accepted that the state owes to every child the rudiments of an education, and is responsible for seeing that each boy and girl receives it. Education must, therefore, be state aided, and the state which provides the money must supervise and control the educational system and be responsible for it. The vast majority of people today will not consent to that responsibility being delegated to any other authority.

People are, however, divided in opinion as to what should be taught in the schools. Roman Catholics hold tenaciously that a school without religion is godless and that character cannot be properly moulded or sound morals taught except through religious teaching, hence, as Father Ryan expresses it in "The Catholic World," "The Church cannot regard as satisfactory any system of education in which religion is not the foundation of the whole curriculum." Many Protestants, and an increasingly large number of them, agree. On the other hand, most Protestants insist that the state-aided schools shall be wholly secular, and that religious teaching is the duty of the Church, the Sunday schools and the home.

The educational systems of these Western Provinces are a compromise between these two opposing views in that they make provision for the establishment of minority separate schools and for the use of the last half-hour of the regular school day for religious instruction if the trustees so decide. This compromise feature is objected to by many, and the opinion is frequently voiced that what this country should have is the national school system of the United States.

Can any one, however, all religious sects in the United States Protestant as well as Catholic, oppose the wholly secular public schools and insisted, as they had from the time of the Puritans, upon religious training in the school. Now, after a century of secular public schools, the churches of the United States are taking stock of the situation and looking results squarely in the face. The general tenor of the complaint of the Protestant assemblies is "the comparative failure of the church's religious education," and that "neither the homes, nor the churches nor the schools" provide adequate religious training, and that "a solution must be found or disaster will befall both the Church and society." They recognize that the Sunday schools do not meet the need, because so small a proportion of the children attend and the instruction for the most part is ineffective, because of lack of time, teacher preparation, and pupil interest. The problem confronting the Church is, therefore, one of combining religion with public education, Church and State working together for a great result, neither can achieve alone.

What is happening? Nineteen of the principal Protestant bodies have formed the Council of Church Boards of Education for the purposes of carrying out a program of religious instruction during public school hours to supplement the regular curriculum. The plan is as follows: On the request of the parent, a child is assigned at fixed periods each week for the study of religion under a teacher designated by the parent. These teachers are appointed and supported by the sects, but their qualifications are to be the same as for other instructors. Likewise, the standard of work and the credit granted are determined as for other subjects. Where no legal bar prevents, classes have sometimes been held in the school buildings; otherwise, in rooms provided by the churches. Textbooks and study materials have been issued by the various denominational publishing houses.

Week-day religious instruction in the public school time has been adopted in about eight hundred communities in over twenty States. In New York City, Catholics and Protestants have united to secure the arrangement there. Laws sanctioning this policy have been passed in Iowa, Minnesota, Ohio, Oregon and South Dakota, while court decisions in two States and official rulings in eight others have protected it. Even where legislation has been rejected, or no action taken, the plan is proceeding without interference.

This trend of thought and action in the United States, where a national secular public school system has so long prevailed, is of interest, and the above outline is presented solely for the information of Western people anxious to discover what is best for their children and calculated to build up a strong Christian country.

On the crest of the Muottas Muir, near St. Moritz, Switzerland, is a hotel whose window lights at night have often been mistaken for stars so high is it above the town.

Nancy: "Mother, teacher says that we are here to help others."

Mother: "Yes, dear, she is right."

Nancy: "Well, what are the others here for?"

Servant—"Mrs. Green is out." Visitor—"Good. When I entered the yard and saw Mrs. Green looking out of the window I was afraid she'd be in."

She—"How dare you speak to me! You don't even know me."

He—"Excuse me, but if I had known you I certainly wouldn't have spoken."

Praise For Anti-Toxin Cure

Most Effective In Warding Off Diphtheria Says U.S. Doctor

The number of cases of diphtheria and death resulting therefrom have been reduced 60 per cent. in Pennsylvania in the last few years, says Dr. Theodore B. Appel, secretary of health at Harrisburg. This phenomenal decrease, Dr. Appel said, has been due almost entirely to the use of toxin-antitoxin.

"Nothing has been more definitely proven," Dr. Appel said, "than the power of toxin-antitoxin to ward off that most dreaded childhood disease—diphtheria."

"Nothing has been more definitely proven," Dr. Appel said, "than the power of toxin-antitoxin to ward off that most dreaded childhood disease—diphtheria."

"Nothing has been more definitely proven," Dr. Appel said, "than the power of toxin-antitoxin to ward off that most dreaded childhood disease—diphtheria."

Development of Marquis Wheat Considered Most Outstanding Contribution To Agriculture

While the contributions to agriculture from scientists and plant breeders have been many and important in recent years, the development of Marquis Wheat has been by far the most outstanding. Its introduction into Canadian agriculture marked a new epoch in the agricultural and industrial life of Canada, and to some extent in the United States.

Marquis Wheat originated from a cross made in 1892 at the Canadian Government Central Experimental Farm, Ottawa, between an early maturing variety obtained in India under the name of Hard Red Calcutta, and the leading Canadian wheat, Red Fife. It was developed by Dr. Charles Saunders, of Ottawa, who, on his retirement a few years ago, was given an annuity by the Canadian Government of \$5,000 a year in recognition of his great contribution to agriculture. He is still living in the Canadian Capital.

The chief points which distinguish Marquis are its ability to mature from six to ten days earlier than Red Fife; greater strength of straw than the latter variety; its greater resistance to stem rust; and its greater productiveness. It is probably safe to say that no new cereal variety thus far introduced anywhere has excelled in so many points or has taken the place of other varieties over so wide an area. By 1915, only six or

seven years after its introduction, Marquis had taken the lead over all other varieties throughout the wheat-growing areas of the western provinces, which lead it increased so rapidly that within ten or twelve years from its first introduction it is credited with having occupied not less than 90 per cent. of all the spring wheat area in the Dominion. Even in the United States, Marquis is conceded to be the most generally grown spring wheat variety, occupying in that country between 60 and 70 per cent. of the entire spring wheat area.

It must also be remembered that the advent of Marquis has made it possible to grow a high yielding, high quality wheat in many districts in which wheat might not have been attempted, or if attempted would have yielded much less, and in many cases would have been of lower quality and grade. While, as may naturally be expected, Marquis may have to give way in certain districts to other varieties which prove better adapted to meet the conditions which prevail there, yet at the present time Marquis reigns supreme as a "general" variety. It is also interesting to note that practically all varieties of common spring wheat which contend for a place in Western Canada are more or less closely related to Marquis, from which they have inherited some of their major virtues.

THE ROYAL OAK COURTMARTIAL

Captain K. G. B. Dewar, centre, and Commander H. M. Daniel, right, officers of H.M.S. Royal Oak, court-martialed in connection with the recent episode on the flagship of the battleship squadron of the Mediterranean Fleet. The charges against them were laid under a blanket provision of the Naval Discipline Act, and concern a letter, deemed subversive of discipline, sent by Daniel to Dewar and forwarded by him to Vice-Admiral Kelly. This letter was said to have contained adverse comment about Rear-Admiral Collard, left, who as a result of the commotion on the Royal Oak "struck" his flag and proceeded to England.

Larger Acreage Shown

Increase In Land Ready For 1928 Western Crop

Acreage prepared for the 1928 crop in the Prairie Provinces is estimated at 16,295,570 acres, as compared with 15,374,862 acres in 1927, an increase for the present year of 902,708 acres, or 5.9 per cent. Manitoba shows an increase of 536,774 acres, or 17.4 per cent.; Saskatchewan, an increase of 1,905,465, or 12.3 per cent. and Alberta, a decrease of 621,331, or 14.5 per cent. There is an increase in new breakings in all provinces, with the exception of Manitoba; all provinces record an increase in summer fallow, while Alberta records a decrease in fall plowing.

Canadian Included In List

The name of one Canadian is included in the list of official judges appointed by the Holstein-Friesian Association of the United States for 1928. It is that of R. M. Holtby, Ontario, Chief Fieldman of the Canadian Holstein-Friesian Association. He is the only one from the Dominion to be included in the list.

Construction of a combination paper mill and box factory, the ultimate cost of which will be \$1,000,000, will commence in Winnipeg some time this year.

Made Ranching Popular

Many Titled People Have Followed Prince Of Wales' Lead

The Prince of Wales' purchase of his ranch in 1919 started a migration of titled European youth to Alberta which is making nobility almost as common as native Indians around the Calgary railroad station. This noble migration has become so marked that one peer, Lord Rodney, has bought a 700-acre ranch where he and Lady Rodney have opened a school of ranching for the titled heads of Europe. Among their present pupils who are taking a two-year course and living in an outhouse like the hired hands are: S. A. R. Prince Charles Phillippe d'Orleans, the young duke of Lorraine; Lord Montague, the Hon. John Stanley and the Hon. Philip Stanhope. A few miles from Lord Rodney's ranch the Crown Prince of Denmark runs a large dairy farm from which he exports tons of butter to Europe annually. Twelve miles west of Calgary Prince D'Abro, of Italy, has one of the biggest cattle ranches in Southern Alberta, Lord Minto, Count DeForas and Count De Roussey are his neighbors.

The Best Varieties Of Vegetables

New Tested Varieties Proven To Be Of High Merit

Vegetable growers, whether gardeners or commercial producers, would find much information of value in the reports of the Dominion Horticulturist. Besides the new varieties originated at the Experimental Farms, practically all of the better varieties of all kinds of vegetables are given thorough test through the Experimental Farms System. In the latest report of the Dominion Horticulturist, available at the Publications Branch of the Department of Agriculture at Ottawa, the varieties that have proved themselves to be of high merit are named and described. The vegetables covered are: asparagus, beans, bush and pole, beets, Brussels sprouts, cabbage, cauliflower, carrots, celery, corn, cucumber, Kohlrabi, lettuce, muskmelon, onions, parsley, parsnips, peas, peppers, pumpkins, radish, rhubarb, safflower, spinach, squash, turnips, tomatoes, and vegetable marrow.

"You swore to your wife that you would never come home drunk again."

"That's right. I am not going home until the morning." — Moustique, Charlerol.

SAYS WAR IS A DISEASE

Dr. Henry Van Dyke Points Out Three Cures For Age

Aliment

"War is one of the diseases for

which man is earnestly seeking a cure," says the Rev. Dr. Henry van Dyke, of Princeton, N.J., formerly United States Minister to the Netherlands.

Dr. van Dyke set forth three cures for the first cause of war lies in the human heart—original sin, passion unrestrained, selfishness unbridled. The first element of cure is preventive hygiene of mind, heart, education, religion, philosophy, one and all. God over all—world welfare.

The second element of cure for war is a reduction of competitive armaments. They are supposed to be the protection of peace, but 1914 proved that they are temptations to war.

The third element in the cure of war is the provision and use of peaceful means of settling disputes between nations. The two old means were diplomacy and conference. They often proved useful, but they sometimes failed. The two new means are the League of Nations and the World Court.

It is astounding, incredible, that America has stood aloof, proudly disdainful or grossly ignorant of these two vital substitutes for the lethal instruments.

The day when America enters the League and adheres to the Court will be a good day for her and for the peace of the world."

Cash On Delivery

Afghan Royalty Could Not Get Credit At London Shops

The London shopkeepers alternately are congratulating and condemning themselves over the fact that the Afghan majesties, King Amanullah and his Queen, visited Berlin and Paris before coming to London.

The shopkeepers were looking forward to sharing the fabulous wealth of the East, and at first were disposed to be peevish because the French and German merchants had first crack at the Oriental purses. Now they have discovered that those purses are empty and their credit bad, they are rather glad, on the whole, that they escaped.

When the first orders were placed, the Bond Street shopkeepers made the usual perfunctory inquiries about their credit, but delivered the goods. Then came a report by one of the banks that the Afghans had bought many thousands of dollars worth of goods in Berlin and Paris, but had not paid anybody.

The Berliners and Parisians were debared by international courtesy from suing, and now are grinning from ear to ear, making the best of a bad business. Bond street, however, drew in its horns immediately, and refused delivery except for cash.

British Boy Immigrants

The demand in Manitoba for British boy immigrants bids fair to exceed the supply. Between 160 and 170 farmers have notified Hon. W. H. P. Foster, Minister of Agriculture, that they are prepared to place the boys on their farms, but it is doubtful whether that number will be available.

Canada's national parks in the Rocky mountains are nearly as large as Belgium and two-thirds as great as Switzerland.

INTERESTING FACTS

ABOUT SIBERIA

Cold Never Ends and Ground Freezes Solid Thirty Feet Down

Speaking at the University of Toronto on "The Ethnological Background of Asiatic History," Sir Bertram Windle gave some interesting facts about Siberia.

Frosty Siberia, as described by travellers in its northern regions, sounded anything but attractive yet the people have so far habituated themselves to the never-ending cold that reports tell of children playing naked in the snow and men clad only in shirt and sheepskin, lounging smoking in doorways, while the mercury freezes in the bulb of the thermometer.

For a distance down of one hundred yards or more the earth is frozen solid. Occasionally a red hot stove in one of the houses melts the frozen ground to its depths, with the result that water gushes up like an artesian well and the house congeals almost immediately into a solid block of ice, while the inmates flee for their lives.

Burial in the frozen earth is impossible, so the dead man is placed in a small wooden cupboard, set on the surface of the ground, together with his best sleigh, the horns of his favorite reindeer, killed purposely to keep him company in the next world, and his driving whip. Small cells are hung above the grave and their sound, as the wind stirs them, keeps away evil spirits. Practically all the tribes of Northern Siberia are nomadic in character and among some it is the custom to club the old people of the tribe to death, a purely family affair, accomplished with no hard feeling on either side.

Immediately south, in the steppes, the country is much like Northern Ontario, with rocky hills, pine trees and silver birches. Here, after an early spring, occur "The Icy, Santa's Days," when a bitter cold wind sets in for a week or so, and prevents the growth of even the most hardy ornamental fruits.

Immediately south, in the steppes, the country is much like Northern Ontario, with rocky hills, pine trees and silver birches. Here, after an early spring, occur "The Icy, Santa's Days," when a bitter cold wind sets in for a week or so, and prevents the growth of even the most hardy ornamental fruits.

Immediately south, in the steppes, the country is much like Northern Ontario, with rocky hills, pine trees and silver birches. Here, after an early spring, occur

THE vast resources of General Motors made possible the high standards of Pontiac performance and value.

Into the New Series Pontiac Six have gone the results of experience gained in the building of millions of cars . . . of discoveries made in the great General Motors Laboratories . . . of authentic styling and master craftsmanship developed by the General Motors Fisher body builders . . . of the manifold economies in General Motors purchasing and production!

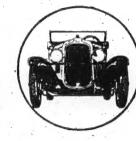

And, back of the New Series Pontiac Six, are millions of miles of relentless testing on the General Motors Proving Grounds.

The performance, the comfort, the quality, the durability of the New Series Pontiac Six are WELL-KNOWN quantities . . . General Motors has proved them.

CANADA'S FORESTS BEING DEPLETED

It is appalling to learn that since the arrival of the white man in Canada, forest fires have destroyed 60 per cent of her primeval forest wealth. Four or five times as much timber has been burned in this country as has been cut for the uses of man and the requirements of commerce. Dispersion of our accessible timber supplies within a period of twenty-five years is forecast.

To bring home to the minds of Canadians that it is too late, the tragic loss that will result to this country if our forest areas are totally destroyed. Canadian Forest Week has been set aside. In the schools, in clubs and public gatherings, the importance of Canada's forest and Canada's forest industries will be drawn to public attention. If everybody in Canada realized that thousands of families and millions of dollars of capital are dependent upon the Canadian forests, everybody would think twice before throwing down lighted matches or cigarette stubs, or lighting fires in dangerous places and leaving them to spread on or below the surface of the ground. Carelessness has destroyed 60 per cent. The axe has taken 13 per cent. Only carefulness will save the 27 per cent. of our forest wealth that remains.

Hon. Charles Stewart, Minister of the Interior, has to do with Canada's forests, and it is encouraging to note his activity in arousing public opinion as to the situation and the imperative need for care in preventing forest fires.

INCREASED INTEREST IN LAND

With the approach of the 1928 crop season, increased interest is being manifested in farm lands situated throughout the district of which Irma is the centre. Reports from various firms dealing in farm lands state that enquiries are being received from the States and from Eastern Canada indicating that a considerable demand for raw and improved farm lands will be experienced from these sources.

This fact is not at all surprising. In a country such as this, where the finest land on the continent can be obtained at tempting prices, vacant spaces are not to remain long. The country will surely be settled completely, and before many years, climatic conditions are as favorable on the average as they have been in the past few seasons.

In addition to the interest being shown by outsiders in local lands, there is a very marked increase locally. Sales representing many thousands of dollars have been effected by real estate dealers during the past few months, and there is evidence of increased interest in the higher priced properties.

Along with this land goes the interest in increased acreage being cultivated. More breaking was done last year than for many years. More new land will likely be brought under cultivation this year than in 1927. And what holds true of this district is applicable to others surrounding Irma.

BABY OF THREE IS CONFIRMED SMOKER

Seattle, Wash., — Having developed into an ardent cigar smoker at the age of three, Freddie Riggs, Seattle youngster, has become the subject of much speculation among doctors.

The boy's mother explained that when Freddie was a baby he was weak and under-developed and refused to eat until he chewed on a pipe. That was when he was ten months old. Then he began to eat. He cut his teeth on the same pipe. When he was a year old he began to chew cigars and shortly after that to puff on them. Efforts to make him quit tobacco have resulted in his stopping eating. Aside from smoking—he has one cigar every night—it is a normal and healthy child. He will be four next month.

When a man who is not used to the woods lights a match and then throws it on the ground, he expects it to go out. But when an experienced woodsman is through with his match it is out. He does not leave it to expectation. He knows.

More Profit from Burnside Chicks

BABY CHICKS,
HATCHING EGGS,
PULLETS,
COCKERELS.

Egg raisers profit when they buy Burnside Baby Chicks. Hundreds of poultry plants in Canada maintain extraordinarily high yields year after year with Burnside stock—hardy, healthy birds with generations of high producing ancestors behind them!

BUYERS OF BURNSIDE CHICKS ARE SATISFIED. 200 p. c. INCREASE IN ONE YEAR!

The demand for our Baby Chicks jumps by leaps and bounds. This year we were forced to hatch over 200 per cent. more chicks than in 1926. Orders on hand now from former customers have made us install two 16,000-egg capacity Petersen incubators. We will hatch over 90,000 chicks in the Spring!

TRAPNESTED S. C. WHITE, LEGHORNS

Our birds have been bred and trapnested for generations to one end—that their progeny will deliver eggs at a PROFIT. Our strain, developed by us, is proving itself. Why feds and coddle low-grade stock when Burnside will give you trouble-free dividends?

VIKING

Continuing to show the enthusiasm
that characterized their first meeting,
the members of the Board of Trade
and friends held their regular monthly
luncheon at the King Edward hotel
on Tuesday. After stowing away a
goodly portion of prime Alberta beef
and trimmings, and enjoying the odd
stogie, President Dr. Little opened the
business session by calling for the
reading of the minutes of the previous
meeting which secretary Anderson
attended to very expeditiously.

Among the correspondence was a
letter from Hon. O. L. McPherson,
minister of public works in the Alberta
government, saying that he
would be pleased to meet with the
Board of Trade at some future time.
The secretary had replied saying that
some date in May would be suitable.
A letter was read from Dr. W. C.
McClurg, dentist of Tofield, who has
made regular professional visits to
Viking during the past eight years,
stating that he had decided to locate
permanently in Viking, and asked the
Board of Trade to assist him in se-
curing suitable offices and residence.

From Canadian Chamber of Commerce
came a letter saying that they
had seen in the press that a live
board of trade had been organized in
Viking and district and congratulated
them upon the move. They also invited
the local board of trade to join the
Canadian Chamber of Commerce.
The matter was left with the executive
committee to decide.

A very pleasant occasion was the
reception of the guests of honor at the
luncheon, Bernice and Alice Swift,
daughters of Mr. and Mrs. Steve
Swift, and Elsie and Mattie Swift,
twins daughters of Mr. and Mrs. Sam
Swift, and Willis Currie, all of the
Clover Lodge district, who had won
many prizes at the recent spring
show at Edmonton in the Children's
section, a report of which was
given in The News last week. Mr.
Purvis introduced these young prize
winners in what was thought to be a
real speech, calling attention to the
fact that products of the Viking dis-
trict had won prizes in many competi-
tions, but when little Bernice Swift
replied, his speech faded into
insignificance, a fact which Mr. Purvis
acknowledged with a deep bow. The
News takes pleasure in reproducing
Miss Bernice's speech to the
Board of Trade, as follows:

"Mr. President, Gentlemen, Boys
and Girls: It gives me great pleasure
to be with you here today, and I
wish to extend a vote of thanks on
behalf of the Junior Exhibitors who
are guests here today of the Board
of Trade.

We boys and girls are proud of
Viking district's live stock winnings
at the Edmonton show and it is
through such laurels that our faith in
the future is strengthened and that
we take greater pride in our home
town from year to year. The calf, pig
and sheep feeding competitions give
us training and marketing advantages
which are wonderful. Through these
we have an opportunity to learn in a
short time the most valuable experi-
ence of several generations which is
an education in itself.

Furthermore they have given us the
spirit which makes things possible
tomorrow which are but dreams of
today.

For cultured people, products of the
soil, good schools, fine live stock, invig-
orating climate, none can excel
Viking District.

The greatest power in the world to-
day is man power and the potential
man power for Viking's future is here
in its boys and girls who stand ready
to carry on its greatest industry, Agri-
culture. I thank you."

President Little added some suit-
able remarks to the effect that the
district as a whole were proud of the
youngsters' achievements and hoped
that their success would continue.

There was considerable discussion
as to the annual clean-up week, and
it was decided that the Board of Trade
co-operate with the town officials in
the matter of a clean-up and paint up
campaign.

The matter of speed signs at the
school grounds and other parts of the
town, road signs, the general condition
of the cemetery, camp site, a memorial
at the station grounds, and several
other matters were brought up and
discussed. Committees were appointed
and will bring in reports at the
next luncheon.

Mr. B. C. Gilpin made an eloquent
plea for the ring-necked pheasants
and for game birds in general. He
gave reasons for the rapid disappearance
of the prairie chicken, saying that as
the country was broken up, there was
smaller areas of natural shelter for them, and a smaller area
for their natural enemies to hunt their
nests in. Mr. Gilpin talked so elo-
quently that Mr. Purvis made a motion
to the effect that some of these
birds be procured for Mr. Gilpin, and
that he experiment with them as to
their suitability for this district. This
motion was unanimously passed.

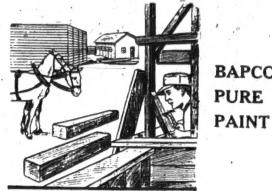

Sonny McGregor was up from Jar-
row for a visit here last Wednesday.

WORLD HAPPENINGS BRIEFLY TOLD

The largest city in the world is getting bigger; the latest estimate of the population of London is 8,600,000.

The Kelowna plant of the Dominion Cannery, controlled by the Canadian Cannery, was destroyed by fire.

The National Assembly at Angora has unanimously passed a bill separating the church and the state in Turkey.

Total assets of Canadian banks increased by \$16,432,311 during the month of February. At the end of February they amounted to \$3,169,373,438.

Addressing the members of the Canadian Club at luncheon in Toronto, Premier Howard Ferguson urged the capitalization of commercial intercourse among the members of the great "British family of nations."

Improvement of highway conditions in the province is forecast by invitations for tenders for concrete bridge construction issued by the Deputy Minister of Highways of the Government of Saskatchewan.

The Canadian Merchant Marine had an operating loss in 1927 of \$729,735, as compared with operating losses of \$901,159 in 1926; \$348,053 in 1925, and \$1,440,850 in 1924.

There is a possibility that the Pacific Cable Company, in which Canada is interested, may be taken over by a syndicate formed of the Eastern Telegraph Company, and the Marconi Wireless Company, according to advice received at Ottawa.

Cadet training in the schools was imposed by Thomas Moore, president of the Trades and Labor Council of Canada, addressing the trustees and ratepayers' section of the Ontario Educational Association in convention at Toronto.

As a verminfuge an effective preparation is Mother Graves' Worm Exterminator, and it can be given to the most delicate child without fear of injury to the constitution.

Co-Operative Poultry Marketing

The head office of the Manitoba Co-operative Poultry Marketing Association has been transferred to Winnipeg. The Association has grown from 119 members in 1922 to 9,000 in 1927, making a total of 93 such groups in Manitoba.

TO WOMEN OF MIDDLE AGE

Mrs. Wilson's Experience a Guide to Women Passing through the Change of Life

Hamilton, Ontario.—"I have taken several bottles of Lydia E. Pinkham's Vegetable Compound, and I do not speak too highly of it as I was the charge of life. I was very weak and sick, and the doctor said I was so bad I could hardly move. I got very sad at times and thought I had a friend on earth. I did not care if I lived or died. I was very nervous, too, and did not go out very much. A friend advised me to try a bottle of Lydia E. Pinkham's Vegetable Compound, so I did. I am a farmer's wife, and we worked hard until lately, and was in bed for two months. I began to feel like a new woman after the first bottle and I recovered. It was great success, also Lydia E. Pinkham's Liver Pill. I am willing to answer letters from women asking about my remedies, as I cannot speak so highly of them."—Mrs. EMMA WILSON, 471 Wilson Street, Hamilton, Ontario.

Sold by druggists everywhere. 0

Imperial Agricultural Research Proposed Empire Chain Of Agricultural Research Stations

The Imperial Agricultural Research Conference which met in London last October, in its report just made public, recommends the creation of an empire chain of agricultural research stations. The report also recommends creating in Great Britain clearing houses of information in agricultural science for the purpose of serving the whole empire, and the training of scientific workers in agriculture for the empire. It suggests that training stations should be located at Queensland, Ceylon, East Africa, West Africa and Malaya. Ten highly qualified men should be the minimum staff at a station, the report suggests, and the annual maintenance is estimated at £20,000.

The report emphasizes the need of highly trained men for colonial agricultural service, and suggests that scholarships should be founded with a view to promoting agriculture. It also recommends the establishment of "corresponding centres" and bureaus, and smaller clearing houses of information at an estimated cost of £20,000 annually, this fund to be administered by a body of men on which the governments of the Dominions and India should be represented.

GREAT HELP TO YOUNG MOTHERS

Baby's Own Tablets Have Many
Uses and Are Absolutely
Harmless

To have in the house a simple, harmless remedy for the minor ills of babies and little children is a great boon to young mothers, and this is exactly what Baby's Own Tablets have been found to be. The Tablets regulate the stomach and bowels, break up colds and simple fevers, allay the irritation of cutting teeth, yet they have no drug taste and the children like them.

Concerning the Tablets Mrs. Ruthie Cronin, Estevan, Ont., writes: "Kindly send me your little book on the Care of the Baby. I have two children, one four years of age and one two years old, and they are in excellent health and the only medicine they have had is Baby's Own Tablets. I always keep the Tablets in the house and am happy to recommend them to other mothers."

Baby's Own Tablets are sold by medicine dealers or by mail at 25¢ a box from The Dr. Willmar Mfg. Co., Brockville, Ont.

Small Town Papers

BY
FRANK PARKER STOCKBRIDGE
Reprinted by special permission from Saturday Evening Post, published by the Curtis Publishing Company, Philadelphia.

(Continued)

"I tell you what, you skeptical old type house," he continued, looking at his wrist watch and stopping me on the street to call me down for a meeting of the executive committee of our editorial association to make arrangements for our convention next summer. If you really want to know what the literary newspaper is like in this year of 1928, you need only to go to the hotel. We haven't any secrets and you can speak the language of the craft well enough to pass for one of us. You'll need some leave to see us, however, as we are scattered over the country, and they'll tell you better stories than I can. Can you spare the time? I'd love to have you come."

"I've got no time," I told him. "I don't like talking."

"But in my eyes!" said Bert. "You used to be my boss, you know, and I want to show the other chaps the guy who taught me the beginning of my trade. They're all right, but I want to meet you. Besides, if you don't know what they have to say I know what'll happen. You'll go round to the newspaper club and tell the old-timers what you need to know about the business. Bert Mills has turned out to be a good man."

I went. And I found out that that novelist's idea of making a living out of a couple of crummy newspapers were not far from the mark. I escaped with my life. Meantime, things have changed in the small town; and, as the saying goes here, "It didn't take long after Bert had introduced me to the others to discover that the country editors of the country papers in the crowd were immensely proud of their profession, their papers and their home towns. That was the most noticeable difference between me and the sort of country editor I had known in my youth. The old-time country editor had plenty of professional pride, but if he was proud of his town, the feeling wasn't often reciprocated. These were men of great local importance; communities, it would tell that by the way they talked and carried themselves."

The successful country newspaper publisher today is no longer primarily a printer, or a publisher, but a man who wants to be a man. "You notice that I said publisher. That means that he is a business man. He may or may not be also an editor or a printer, or both, but the emphasis is on the business side of the paper. He is his own editor as well as publisher, and there are still a good many who began as printers and will always be printers at heart. But publishing is a business of today. The newspaper of today is definitely a business, and a very profitable business."

There were country publishers from every part of the United States at the meeting, as well as representatives of business concerns engaged in merchandising to sell to country papers. Between listening to the discussions in the conference and the time I spent at the luncheon table, where Bert Mills had brought a dozen other good fellows together, I discovered that my former ideas about country papers were based upon common sense, and as exact as the passing of time.

Much of the picturesqueness and glamour which surrounded the old-time country editor and his shop have disappeared, to be replaced by more efficient methods. There are still a few traditional pioneers, penetrating into new fields with the vanguard of civilization, to set up their presses and print their newspapers in an amateurish, pedagogic way, but these are rare instances. In the few remaining frontiers, and even in such cases, subscribers, advertisers and profits follow faster than B. Franklin's name, my old boss, ever dreamt of.

A California editor told us of a man in his own state, F. L. Drexler, who took a pioneering chance less than five years ago.

"I don't know how much capital he had," said the California man, "but it wasn't much. He bought a little pa-

Boat Has Charmed Life

Film Company Fails Three Times In
Attempt To Blow Up
Schooner

The third attempt by a moving picture company to blow up the schooner Amy in the English Channel to complete its film story of Britain's famous "Q Ships," which laid traps for the German submarines, failed because, according to seafaring men, she is either haunted or has a charmed life.

The seamen said that it was unlucky to remove her old figurehead or woman clasping a bunch of flowers, now on view in a Weymouth hotel.

"No vessel ever sunk without her figurehead," said an old salt.

The Amy was towed to mid-channel accompanied by naval vessels. The officers placed a charge in the spot where it was convenient to sink her, but trouble began when the electric leads between the Amy and the tug parted twice.

The schooner's decks and sails were then soaked with kerosene. Flares were laid and the crew abandoned her, but still she refused to burn. A submarine afterward cruised around the schooner to make sure that the fires were out. The demolition crew was ordered to return but refused and the movie company had to tow her back to Portland.

B.C. Fruit Crop Prospects

Southern Okanagan Districts See Big
Yield In Sight

The Southern Okanagan has prospects of a fine fruit crop this year. According to fruit inspectors, estimates of yield in sight give large increases over 1927. Based on the percentage of increase seen in the bud showing this year and barring unforeseen conditions, the 1928 apple crop in the Southern Okanagan and Similkameen should go about 1,075,000 boxes, as compared with approximately 550,000 boxes in 1927, and 1,040,000 boxes in 1926, which was the bumper year.

The Oil Of Power.—It is not claimed that Dr. Thomas' Electrical Oil that will remedy all ills, but its uses are so varied that it can be looked upon as a general pain killer. It has achieved that greatness for which its excellence is known to all who have tested its virtues and learned by experience.

Canadian Ice Cream For China

Gradual Education In China and
Japan For Canadian Products

Growing shipment of ice cream to Shanghai from Vancouver, occasioned by the visit of the president of the British Columbia Sugar Co., Mr. Cotterell reports that a gradual education in China and Japan for Canadian apples and butter, as well as for Canadian beef and bacon has come about. The new plant will cost about two million dollars.

Minard's Liniment for Backache.

It is easier for a man to be the architect of his own future than the builder of it.

Hoarbt Bosworth, famous actor of stage and screen, spends his spare hours building ship models.

LESSON No. 17
**Question: Why is
emulsified cod-liver oil
so efficient a food for
young children?**

**Answer: Rickets or
weak bones are evidences
of lime-deficiency. Emul-
sified vitamin-rich cod-liver
oil helps Nature supply
this deficiency.**

Pure, pleasantly flavored,
nothing quite surpasses
SCOTT'S EMULSION

IGNORANT OF SYMBOLISM

Hundreds Of Scarves With Ger-
man Monarchical Design

Worry By Britshers

We would like to know whether Germany has been chuckling over the incident as an excellent joke, or whether with familiar Teutonic stolidity she has done the thing because it happened to be the easiest way out of a bad deal. The other day a Newcastle, England, police court justice observed so many scarves in his courtroom, all of black, white and red, that his curiosity aroused, he asked one of the defendants where he had got his.

The latter said it was a Christmas present, but pursuing the matter further, the judge discovered that this and vast numbers of such scarves of the same colors and design, worn not only at Newcastle but at London, Manchester and other British cities, were parts of a huge shipment from Germany.

The colors named are of course the German monarchical ensign. Further examination disclosed that the fatherland had manufactured a tremendous quantity of these scarves as preparation in interested quarters for a restoration of the monarchy. When the anticipated coup failed to come off the surplus stock of the red, white and black adorment was "dumped" in Britain and a public ignorant of their symbolism but finding the scarves attractive adopted them as the fad of the hour. It must have amused German visitors of the more intelligent sort to see the English thus parading by the thousands the emblem of the Kaiser's empire.

Tar Sands For Manitoba Highways

Alberta tar sands in huge quantities are likely to be utilized in the big programme of Manitoba for new highways this summer. The plan worked out is to try to have a plant at McMurray or some other point adjacent to these deposits and now extract the tar from the sands to avoid shipment of the voluminous raw material.

Canadian Muskrats Go To Belgium

Muskrats have been added to the fur bearers to leave Canada to become foundation stock in other countries. Forty of these little animals have been shipped through the Canadian Pacific Express Company to Belgium to become the nucleus of a fur industry.

HEART WAS SO WEAK Had to Stay in Bed

Mrs. E. Wilson, Lethbridge, Alta., writes: "My heart was very weak, and I had to stay in bed for five weeks with it."

"My aunt advised me to take

**MILBURN'S
HEART
AND
NERVE PILLS**

as she had taken them with good results after a bad heart operation.

"I took them and some time after a doctor came to examine me for life insurance and he said there was nothing wrong with my heart."

Milburn's Heart and Nerve Pills are a box at a all druggists and dealers, or will be mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

ASSURANCE DOUBLY SURE

Though the days of passenger liners in distress have gone, ships' seamen are still encouraged to keep fit by lifeboat rowing competitions. Here is Col. W. J. Gear, vice-president of the Robert Reford Co., presenting a cup and individual medals to winners from the Canadian service Cunarder Alania, recently.

W. N. U. 1729

what you mean, Doctor, and I know it's a grand thing to always be able to lay all the blame on the women. You see the Lord lets her bear all the pain, and we see to it that she gets all the shame: so why not let the rest of the women bear the blame—there's no use spreadin' it any further."

"You misunderstand me, Mrs. Corbett," said the doctor, quickly. "I have the utmost sympathy for these unfortunate girls, and that is why I would like the women to do something. Indeed, I spoke to the Local Council about it when they asked me to address them."

"That was fine and good of you, Doctor," commanded Mrs. Corbett. "I'm a good lad at giving advice, too. Don't it make a person feel grand to give out a good gob of advice, and then if anyone does go to the devil we can say, 'I warned you, anyway, you can't say I didn't. But take the tip I gave you now, Doctor, get busy on the home. Leave the women to women—it's women who look after women, anyway."

The doctor interposed: "Now, Mrs. Corbett, I cannot agree with you there. You must have noticed that women are very hard on women." He was pulling on his gloves now, rubbing out the wrinkles carefully.

"No, I haven't noticed it, but I've heard it—I've heard a lot of men say it!"

"Now, Mrs. Corbett, I see you are a great cynic, and I would not have thought that of you!" Dr. Symond said, laughingly, as he shook hands with her.

"Don't let me keep you, Doctor," she replied, "and it's Christmas and all."

When he was gone, Helmi opened her eyes. "I can speak English," she said, lifting her head from the pillow. "I heard what he said. Did you give me the ring to wear?"

"Just so," said Mrs. Corbett; "and it's grand that you can speak so well. Swede girl, are you?"

"No, Finn," said Helmi, "two years in Canada. Do you know anything about me? You said my man had joined up—do you know anything about him?"

"Not a word, but you'll tell me when you feel like it," said Mrs. Corbett encouragingly.

Helmi regarded her friend gratefully. "You were good to me just now to say things for me and put the ring on my hand. I could not tell him when he asked me—he made me want to die."

"Sure Mike, I know, he's a good little man in his own way, but it's none of his business. He may be sure no woman goes knockin' round the country without her man at a time like this for the fun of it. Oh, well, you don't need to confess to him, or anyone for that matter, but only to God Himself."

"God don't care," said Helmi bitterly, "I pray and pray but God never hears!"

"Save us all!" cried Mrs. Corbett.

"That's an awful way to talk about God, who is more anxious to do right by us than we are to let him."

"Are you a Christian?" asked Helmi.

"My gracious, how do you think I could ever run a Rooming House if I wasn't and keep from committin' murder. If the love of God hadn't been shed abroad in my heart why do you think I would butt in and tell lies for you?"

"Is it always wrong to tell lies, even kind, good lies like yours? Will God be mad with you for telling a lie for me?" Helmi was afraid her good friend might get into serious difficulties over her.

Mrs. Corbett threw out her hands and laughed. "No fear! God ain't as touchy as lots of people try to make out. It isn't as if I lied to be mean or to hurt someone, and I'll tell you how I've got it sized up. It's a sort of treat for Him to hear someone lie for a woman instead of to her, or about her if you can get what I mean."

Helmi nodded.

"Don't be talkin' now, for tomorrow is the third day, and then's the time for the fever, if it is comin' at all. Rosie is bringin' your hot milk, and Mrs. Kalinski has your supper cookin' on her stove, and I must be runnin' now to see how the wee lamb is. She's done nonth but sleep yet, and that's the best thing she can do with the long load of life ahead of her."

Helmi nodded.

"Don't be talkin' now, for tomorrow is the third day, and then's the time for the fever, if it is comin' at all. Rosie is bringin' your hot milk, and Mrs. Kalinski has your supper cookin' on her stove, and I must be runnin' now to see how the wee lamb is. She's done nonth but sleep yet, and that's the best thing she can do with the long load of life ahead of her."

CHAPTER XXIII.

Helmi stayed on in Number 18, taking her meals with the Corbets, and trying to pay for their kindness by cleaning up their congested suite and making clothes for Rosie and Danny, who had become the baby's devoted attendants. Mrs. Corbett had full of encouragement when she heard Helmi's whole story.

"Your man has been delayed, that's all. Sure he'll come—never say die, Helmi, dear—and just think of how

Aluminum serves mankind in many ways—one of them being as a container for fine teas. All Red Rose Tea is put up in clean, bright aluminum, thus insuring its coming to your table as fresh and flavorful as the day it was packed. 7-W

pleased he will be to find this fine little girl, the very picture of himself, with her lovely dark eyes. She must be the spittin' image of him, for she's not a bit like you. Put looks don't matter so long as you are healthy, and a better child I never saw."

Encouraged by Mrs. Corbett's confidence, Helmi, as soon as she was able, began to go to the station on the two nights of the week the Peace River train came in, sitting huddled on a seat that commanded a view of the big moon-faced clock. Although due to arrive at four in the afternoon, it was often past midnight before the train drew in.

The station agent began to notice the pale girl with the big eyes who came each train night and who seemed so anxious.

One night an iron gray old man was met by his iron gray old man, who looked so much like him that he might have been his sister. Helmi watched them, noting their fervent kiss, their light steps as they walked happily away arm in arm, both talking. Helmi saw it all, and somehow it comforted her to know that some had found happiness in life, even if it had apparently passed her by.

(To Be Continued.)

Recipes For This Week

(By Betty Barclay)

WAFFLES

1 cup milk.
1 1/2 cup flour.
1/2 teaspoon salt.
3 teaspoons baking powder.
2 eggs.
3 tablespoons melted butter.
Mix and sift dry ingredients, add milk gradually, yolks of eggs well beaten, butter and whites of eggs beaten well. Cook on a greased hot waffle iron. Serve with syrup.

CROUTONS FOR SOUP

Cut slices of stale bread thinly spread with butter in 1 1/2 inch strips, removing crusts. Cut each strip in one-third inch cubes, put in pan and bake until delicately brown.

HOT-SPICED LEMONADE

4 lemons.
1 quart boiling water.
1 teaspoon whole cloves.
1 cup sugar.
6 cherries cut in small pieces.
1 tablespoon minced crystallized ginger.

Extract juice from 3 lemons; cut remaining lemon into thin slices, pour boiling water over sliced lemon and add remaining ingredients.

PHENOMENAL GROWTH OF ENGLISH LANGUAGE

Appendix To Oxford Dictionary Needed To Accommodate New Words

The English language expands so fast that philologists cannot keep up with it.

This phenomenal growth is indicated in the work upon the New Oxford English dictionary which was begun seventy years ago in an attempt to produce a completely modern etymological record. But so rapid has been the expansion that the new volume will not contain many of the words in current usage unless they will be included later in a special appendix.

Many of the philologists who started upon this colossal work already have died and their task has been taken up by other scholars. Dr. C. T. Onions, the present editor, who commenced his duties in 1895, has personally supervised the compiling of the letters S, W, X, Y, and Z.

"Although this is perhaps the greatest dictionary in the world," he declared in an interview, "there are many discrepancies caused by changes of language. For instance, the word appendicitis is not in the dictionary because the section A appeared before the word was ever heard of. Similarly, airplane, tank, jazz, vitamins and many such modern words have been omitted. We hope to include them in an appendix."

"Even crossword, which has caused such a tremendous boom in the sale of dictionaries, is not included."

Indicating that the new work is extremely intellectual, Dr. Onions continued: "It is interesting to compare an old dictionary of the eighteenth century with the Oxford dictionary. The old one defines horse as simply a beast. Whereas our definition is: 'A solid hooved perissodactyl quadruped (equus caballus)'."

Has Famous Library

King Has Wonderful Collection Of Books At Windsor Castle

King George, of England, is very fond of reading and is an authority on naval history. His personal collection of books at Buckingham Palace numbers about 3,000. Among these are first editions of the works of Emerson, Longfellow, and Oliver Wendell Holmes. He also possesses a large library at Sandringham, containing 15,000 books, and also the famous library at Windsor Castle, one of the largest in Europe, containing more than 170,000 books, as well as a large number of valuable prints and MSS.

"And J. Hawk McNoodle is a tight one, say you?"

"Tight? That fellow wouldn't give a beggar a bite if he owned the Sandwich Islands.

If men are always judged by their company it's pretty tough on some men who are always alone.

The Wrigley Swimming Marathon Trophy is a perpetual trophy to be competed for each year. The first Wrigley Marathon was held off Catalina Island, and won by George Young, of Toronto. The second Wrigley Marathon was held at Toronto and was won by Ernst Vierkotter, of Berlin, Germany. The third Wrigley Marathon will be held in 1928, either in Canada or the United States. The Wrigley Trophy is a reproduction in sterling silver of the famous "Flying Mercury" modeled by Giovanni da Bologna. The position of the figure is changed to show Mercury presenting to Father Neptune a wreath. Neptune with his trident, dolphins and water surrounding are in bronze. The figure Mercury contains over 1,000 ounces of silver. In addition to the big trophy there will be provided annually a replica in sterling silver and bronze, to be presented to the city where the Marathon is held.

Teeth and Health

Issued by The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

WHY CARE FOR THE BABY TEETH

Of course, as we said, they will be lost eventually, then why bother to care for them?

First, there is the inevitable decay, as a result of neglect, with it's attendant tooth-ache; and it may be because of this destruction and pain, that the baby teeth are easily destroyed. Second, there is the extraction and as a sequence the little jaw does not develop at this point as it would have done with the tooth left in.

Third, there is this other danger, that the too early and troublesome extraction of the temporary molars, there is the grave possibility of bringing away or otherwise destroying the developing cuspid, which frequently lies within the spreading roots of the former tooth.

Fourth, it is the reverse condition where the temporary tooth is retained too long, because of interference through pull, disease, with the natural process of shedding, thus causing the succeeding tooth to erupt out of place or not at all, either of which is bad.

Little Sonny is going to have some crooked teeth in his second set, and a malformed jaw, which means a facial deformity of greater or less degree.

Fourth, it is further true that neglect of these "baby teeth" may bring about more serious results than equal neglect of their successors, since decay will make much more rapid progress in them than in the larger and better developed teeth of the second set.

Above all, remember that these teeth are to serve Sonny through the formative period which includes the years of his greatest growth and development, and that his growth will depend largely on his ability to properly masticate his food, which ability is exactly proportional to the soundness of his teeth.

Will Teach People How To Eat

Sir William Arbuthnot Lane, famous surgeon, would like to be dictator of Great Britain so he can reduce the number of his patients by one-half. He would do it by teaching people how to eat. They stuff themselves now, he says; every mouthful is a coffin nail; ten years hence if we stop people committing suicide by overloading their stomachs we may begin breeding a race of supermen and superwomen.

Appropriating an unused house in Coburg, Oregon, colonies of bees working steadily for four years or more have packed the walls of the building solidly with honey.

GRADS RETAIN DOMINION CHAMPIONSHIP

The Edmonton Grads are still sitting on top of the world. In a series of two games with the Toronto Lakesides, Eastern champions, on Saturday and Monday evenings at Edmonton, for the Dominion championship the Grads emerged victorious in the most hard-fought series ever held in the arena at Edmonton. The Grads only nosed out a victory by two points in Saturday night's game, 27 to 29, but they caught their stride on Monday evening and won 33 to 22, thus holding the championship of Canada for the eighth consecutive year by thirteen points. They have easily defeated the best teams the U. S. have sent up, and are now preparing for a trip to the Olympic games at Paris to defend their world's title.

"Now if you are always kind and polite to your playmates, what will be the result?" asked a Sunday school teacher of a little boy here last Sunday. "They'll think they can lick me," he replied.

"I don't know whether I will like these photos or not," said a lady in a photo gallery in a neighboring town, "they appear to be rather indistinct." "But you must remember, madam," replied the diplomatic photographer, "that your face is not at all plain."

"A diamond is the hardest known substance, inasmuch as it will cut glass," remarked a local jeweler. "Glass!" exclaimed a local cynic. "My dear sir, a diamond will even make an impression on a woman's heart."

Main Street

Mr. R. J. Tate has been spending a few days in the city.

Irma Ladies Aid met at the home of Mrs. Thorp, Thursday afternoon.

Mrs. L. Smith returned Monday after spending a few days in Edmonton. Mr. and Mrs. Steve Jones of Viking spent Sunday afternoon in Irma.

The United Grain Growers have a gang of men installing an air dump in their elevator at Irma.

On Thursday, May 3rd the Women's Institute will meet at the home of Mrs. Mathison.

Mr. and Mrs. J. Jack have moved in the new house Mr. Jack has just erected west of the Irma United Church.

Mr. C. D. Finch, formerly of Edmonton has arrived to take charge of the local branch of the Imperial Lumber Co.

Mrs. C. A. Riley is visiting her daughter Mrs. J. B. Horn near Alliance. Mr. Horn is able to resume teaching after his serious illness.

Mrs. C. B. Reed left Thursday morning for Ponca City, Oklahoma, where Mr. Reed has been taking special treatment for some time. Word arrived Wednesday that Mr. Reed's condition was not improving and advising Mrs. Reed to come.

This has been an ideal week for getting ready for putting in the spring crop. After about a week's nice warm weather the farmers have practically all made a start on the land and they all have the same idea of putting in a larger and better crop than ever before. A large number of tractors are being delivered and these will enable their owners to handle a larger acreage than by the old method of horsepower.

To Laugh or Not to Laugh

Dr. James J. Walsh, noted New York physician, thinks laughter the best exercise. It produces mechanical stimulation on virtually every organ in the chest and abdomen by mechanical movements of the diaphragm. But perhaps too much can be said for laughter. Natural laughter is a fine and happy expression. A forced laugh is sad. The most irritating people in the world are those who are always smiling. And Dr. Fishbein, editor of the American Medical Journal, calls attention to the fact that although man may be the only animal that laughs, the same stimulation of the diaphragm comes from the moaning of a cow and the braying of a donkey.

A newly married young man here returned home the other day at noon to find his bride in tears. "Why, dearest, what is the matter?" he asked. "Matter enough," she sobbed. "I've lost the place in the cook book, and now I don't know what I'm cooking."

Speed

Never Before

has any car of this size and weight offered you such speed, power and finish. We claim 55 miles an hour as the "Whippet" does, but many owners throughout the country are reporting better than 60. And the "Whippet" gives you the most up-to-date features—4-Wheel Brakes—Remarkable Economy—Narrow Corner Posts—Beautiful Body Lines.

Reduce the Fire Fiends Yearly Harvest

NOT fire—but the CARELESSNESS which fails to quench it when its useful purpose has been served, is the ENEMY to mankind. He who by neglect causes fire in the forest may well expect the same treatment as would be accorded to one who tosses a match into a neighbour's haystack.

Issued by Authority of Charles Stewart Minister of the Interior

STAMP OUT CARELESSNESS

A WILLIAM the FOURTH CHARTER

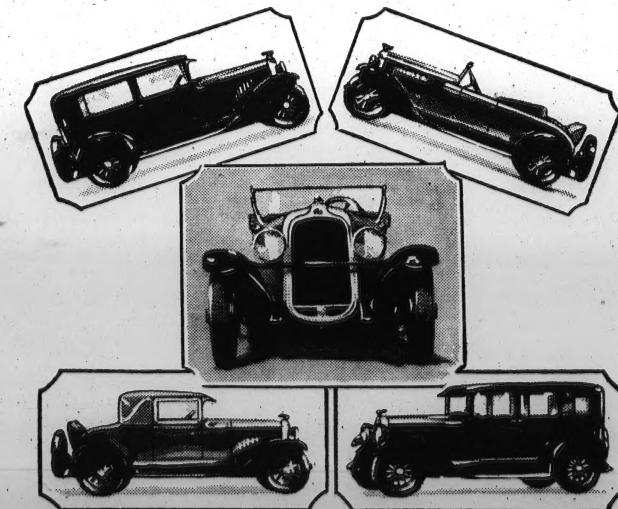

THE original Royal Charter of the Bank of Montreal, bearing the seal of William the Fourth, and renewing the charter previously granted by the Legislature of Lower Canada, is well preserved in the Bank's museum.

During more than one hundred years since it was first incorporated, the Bank of Montreal has gone steadily on its course, serving the people of Canada and enjoying the unshaken confidence of successive generations.

BANK OF MONTREAL

Established 1817

Total Assets in excess of \$830,000,000

The past year has been an extremely successful one for the Pontiac six, and the fruits of this success are seen in the new series Pontiac, announced this week, which incorporates numerous improvements and refinements at no increase in price. The four models illustrated above include the graceful lines of the new car. At the upper left is the two-door sedan and at the upper right the rakish new sport roadster, with its convenient folding seat. A head-on view of the roadster, showing the deep, narrow radiator and two of the four-wheel brakes, appears in the centre panel. At the lower left is the beautiful cabriolet and to its right the new four-door sedan.
